CAREER OBJECTIVE

Forward-thinking Electronics and Communication Engineering student seeking an entry-level IT Software Engineer position at TCS. Aiming to leverage hands-on expertise in digital logic, VLSI, Artificial Intelligence/Machine Learning workflows, programming languages, and computational modeling alongside client-facing operational experience to contribute effectively to innovative enterprise applications.

PROJECTS & CERTIFICATIONS

- Traffic Light Controller (VLSI Project):** Designed and simulated a finite state machine (FSM) based Traffic Light Controller on **EDA Playground** using Verilog HDL/VHDL testbenches, timing verification, and digital logic functional validation.
- Smart Lender Loan Approval Predictor (AI/ML Project):** Developed an end-to-end Machine Learning model under **Skill Wallet (SmartBridge)** to evaluate applicant data and predict loan eligibility using preprocessing, feature engineering, and classification algorithms.
- C & Python Programming Certification:** Successfully completed specialized coursework on **Nexora Hub Platform** covering OOP concepts, data structures, algorithms, and logical problem-solving in C and Python.
- Best NSS Volunteer Award & Certificate:** Recognized as the **Best NSS Volunteer** for outstanding contributions to community outreach, social service drives, campus events, and public awareness campaigns.
- Best Election Duty Completion Certificate (2024 Elections):** Awarded for exemplary service during the **2024 General Elections**, supporting administrative operations, venue setup, and logistical coordination.

EDUCATION

Bachelor of Technology (B.Tech) – Electronics & Communication Engineering	Graduation: 2027
Swarnandhra College of Engineering and Technology (JNTUK) Aggregate: 72%	
Intermediate (Higher Secondary)	2023
SASI Junior College (Board of Intermediate Education, AP) Score: 89%	

INTERNSHIPS & PROFESSIONAL EXPERIENCE

VLSI Engineering Intern — BR CONCEPTS PVT LTD	May 2026 – Jul 2026
- Gained hands-on experience in VLSI design methodologies, digital logic verification, and hardware description workflows. - Worked on functional simulation, timing verification, and RTL design testing.	
Artificial Intelligence & Machine Learning Intern — Skill Wallet (SmartBridge)	Completed
- Completed specialized training and project execution focusing on AI/ML core concepts and data modeling pipelines. - Built and optimized classification models for real-world predictive workflows.	
Billing & Transaction Associate — D-Mart Retail Operations Desk (Tanuku, AP)	Nov 2025 – May 2026
- Managed digital point-of-sale terminal systems processing card, cash, and integrated UPI payment APIs with high precision. - Conducted daily backend software transaction log data reconciliation against physical cash drawer outcomes.	

TECHNICAL SKILLS & COMPETENCIES

Programming:	C, Python
AI/ML & Software:	Machine Learning Classifiers, Predictive Modeling, Data Preprocessing, EDA Playground
Core Technical:	VLSI Design, Xilinx Vivado (FPGA Design), MATLAB, Simulink, Digital & Analog Electronics
Languages Known:	English (Professional Working Proficiency), Telugu (Native Fluency)

EXTRA-CURRICULAR ACTIVITIES & INTERESTS

- National Service Scheme (NSS):** Active volunteer in social service drives, community outreach initiatives, and campus events.
- Sports & Games:** Active player and enthusiast in **Kabaddi**.
